

PETITION To the House of Commons

The Petition of the residents of Stoke-on-Trent

Declares that improving rail infrastructure and providing better rail services in the south of our city is vital for the growth of our local economy; further that it would create jobs and unlock the potential of unused brownfield sites in our area; and further that it would greatly benefit commuters and passengers.

The Petitioners therefore request that the House of Commons urges the Department for Transport to take such action as is necessary to reopen the railway station at Meir.

And the Petitioners remain, etc.
